

FAO Optometrists!

If tempted by the financial carrots dangled by Optical Express, consider this...

- Reputable recruitment agencies refuse to advertise for Optical Express staff.
- If you're happy to pressure your trusting patients to buy unnecessary and unregulated refractive eye surgery in return for commissions and prizes, then Optical Express want you!
- If you have integrity, and are not prepared to pressure people into undergoing surgery in return for commissions & prizes, then Optical Express don't want you!
- Work for Optical Express and it will become the norm to lie to thousands of damaged patients that their vision will improve - instructed by Tweedledum (aka Stephen Hannan) to drag out their aftercare to its 1 year limit, and then kick them over to the NHS.
- If you want to risk being reported for breaching GOC regulations, then Optical Express is the place for you.
- Optical Express has a BAD reputation in the industry, and their days are numbered - so think carefully before compromising your future career by selling out your integrity!
